

This is my letter expressing you my support for getting/ requiring licensure for sign language interpreters! As myself, a Deaf advocate and former Deaf president of OAD and now retired PCC ASL instructor over 31 years, I strongly encourage you the members of committees consider to get this bill HB 3231 passed that will give a strong qualified accessibility for Deaf people! My understanding is that our current ADA is doing for the disabled people for the accessibility and it was grateful to have the bill but we need more teeth stronger specifically on using qualified / licensed interpreters to meet our communication needs seriously! I had confronted several interpreters doing terrible due to their unskilled professional job, very frustrating for us! Thank you for your attention to this matter!
