

Our country has been suffering since the start of this pandemic. Our state continues to suffer and the lumber industry is the industry that this state was built on. It would be irresponsible to impose a tax on lumber. This will continue to cripple the industry and continue to put a strain on the lifeblood of our state. For too long, our Governor continues to try and change what makes Oregon great and enough is enough. I strongly oppose this measure and if our representatives truly care about this state, they will stop this bill from moving forward. Thank you for your time.
