

I support HB 2367. It makes sense. We can only solve the crisis of homelessness with housing, care and services. We can not solve the homeless problem by criminalizing the victims. Each of us must look deeply into our hearts and answer the question, why do we allow a homeless crisis to exist? Homelessness is a result of policy decisions and budgetary decisions. People experiencing homelessness must be allowed to do the best they can to survive on the street, to make their own self organized communities, and to rest, as best they can, in public spaces. Let your humanity shine through and support HB 2367. Then, let's focus on solving the actual problem, for the sake of people who are experiencing being homeless.
