

I support this bill because its a basic human right for people to rest. Whoever needs to lay down, no matter your gender, race, etc, and take even a minute's break should be allowed to. That is in the constitution. It's not illegal to be tired. It's not illegal to be broke. It's not illegal to not have something and to need something. We're all on the same side. We are asking for a simple thing, just leave us alone.
