

TESTIMONY REGARDING

Appropriations to Department of Agriculture, Noxious Weed Program

April 14, 2021

Joint Committee on Ways and Means Subcommittee on Natural Resources

Senator Kathleen Taylor – Co-Chair

900 Court St. NE, S-423, Salem, Oregon 97301

sen.kathleentaylor@oregonlegislature.gov

Representative Jeff Reardon – Co-Chair

900 Court St. NE H-493, Salem, Oregon 97301

Rep.JeffReardon@oregonlegislature.gov

Senator Dick Anderson

900 Court St. NE, S-303, Salem, Oregon 97301

Sen.DickAnderson@oregonlegislature.gov

Senator Lew Frederick

900 Court St. NE, S-419, Salem, Oregon 97301

Sen.LewFrederick@oregonlegislature.gov

Representative Vikki Breese-Iverson

900 Court St. NE, H-377, Salem, Oregon 97301

rep.vikkibreeseiverson@oregonlegislature.gov

Representative Paul Holvey

900 Court St. NE, Salem H-277, Oregon 97301

Rep.PaulHolvey@oregonlegislature.gov

Representative Khanh Pham

900 Court St. NE, H-486 Salem, Oregon 97301

Rep.KhanhPham@oregonlegislature.gov

Representative David Brock Smith – Member

900 Court St. NE, H-379, Salem, Oregon 97301

Rep.DavidBrockSmith@oregonlegislature.gov

Distinguished Senators and Representatives,

The Clackamas Soil and Water Conservation District welcomes the opportunity to provide written testimony regarding the proposed appropriations to the Oregon Department of Agriculture to address natural resource related issues. As an organization that works directly with the Oregon Department of Agriculture on a variety of topics including water quality and noxious weeds, we know all too well the importance of our natural resources to Oregonians.

We have recently become aware of proposed reductions to the Oregon Department of Agriculture noxious weed control program. Because we are active in regional efforts to control noxious weeds, we are familiar with the impact that these invasive species have on our local economy and natural resources.

Weeds are more than a gardener's dilemma. They threaten the livability of our communities and adversely impact our social, economic, and natural resources. One study on the *Economic Impact from Selected Noxious Weeds in Oregon* looked at just 25 of our 128 designated noxious weeds and found that these 25 species alone cost Oregonians "\$83.5 million in personal income to the State's economy" per yearⁱ. Without active management these losses are predicted to rise to \$1.8 billion annually. These damages are disproportionately felt by our agricultural and natural resource-based producers.

Noxious weeds also impact the livability of our communities. Many of the invasive species currently targeted by the Oregon Department of Agriculture pose a threat to human health and property. Some weeds are known to cause severe rashes and burns while others are highly poisonous to people, pets, livestock, and wildlife. These invasive weeds degrade the quality-of-life that Oregonians enjoy and alter the way we interact with our surroundings.

Oregon's wild lands and natural areas are also adversely impacted by invasive species. Noxious weeds displace our native plants and animals, degrade the quality of our natural resources, and result in a landscape that is less Oregon-like. This disruption of our local ecology leads to the continued degradation of our natural systems and the viability of our tourism-based economy. Oregon's natural areas generate millions of dollars of revenue from tourism each year and form a vital component affecting the livability of our communities.

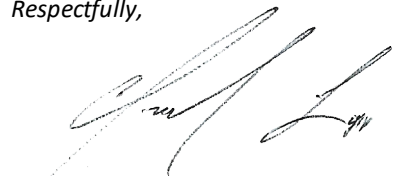

The Oregon Department of Agriculture serves a vital role to the citizens of Oregon by mitigating the many direct and indirect impacts from invasive species. The assistance and tools they provide through their network of regional Integrated Weed Management Coordinators are invaluable resources that empower local entities like the Clackamas Soil and Water Conservation District.

The proposed shift of \$464,855 in staff resources from the Noxious Weed Program to the Hemp Program will greatly undermine the ability of the Noxious Weed Program to address critical invasive species threats to Oregon. This reduction will undermine the ability of the noxious weed program to accomplish its mission and will undermine the state and local partnerships they support. We routinely partner with the Noxious Weed Program, and the many accomplishments realized through these partnerships will be threatened by this budget reallocation.

As you deliberate appropriations to the Oregon Department of Agriculture, we ask that you please consider the vital role undertaken by the noxious weed control program and continue to protect Oregon's most valuable natural resources.

We sincerely thank you for the opportunity to provide testimony on an issue of such importance to Oregonians.

Respectfully,

Chris Lapp, *District Manager*

Samuel Leininger, *WeedWise Manager*
