

I just read that there is a relief from the federal government for 4 billion dollars to the state of Oregon. Then right after that read about how that money could be used and only helping a minority of Oregonians.

In my opinion this money shouldn't be used to build facilities or for infrastructure. What it should be used for is to help all Oregonians. How can that happen? Easily. Used to to give Oregonians a tax break. That helps all Oregonians since all of us pay taxes. That is real help. Yet the first thing I see is Reps trying to get money that only benefits people in their areas and then only a small minority of those people will benefit.

I mean, where are we right now? Are we in a pandemic or are we not? Because with suggestions like that it would seem like we are not. Small businesses are still struggling to recover. Oregonians who have lost their jobs and trying to catch up on bills from losing their jobs. Schools are still closed but all you can think of is spending?

It's this line of thinking that makes Oregonians not trust you. I will tell you when I see government funded projects all I see is thousands of dollars flying out the window. I have never seen a government ran project do nothing but waste money. Point in fact. The new Marion County building downtown Salem. Built incorrectly with major flaws with kick backs and of course wasted money because it's never revenue driven. There is nothing more wasteful of money in this world than government ran projects that are self serving. In a different letter I read about 4000 bills that need to be voted on? Are you kidding me. More regulation and tax I'm sure. Like the American people aren't regulated and taxed enough already. For what purpose? As far as I'm concerned we aren't the land of the free. We are the country of tax and regulation. I can't wait until we get some people that want to deregulate and drop taxes.

You think the American people have forgotten about the cheated election? You think any logical person wouldn't believe that on those fake ballots that every Democrat candidate wasn't marked. So my point is this. You have now stolen our rights to pick our elected officials. So you best be doing what's right. Or are you just going to double down like people aren't being woke to what is going on in our government behind closed doors. I guess the "pandemic" is your perfect cover for that now.

In other words we don't trust you and from me that's for both sides of the aisle.
