

This bill aims to create more bureaucracy and a singular way to add endless road blocks to prevent law abiding citizenry the access to a basic civil right. The right to self preservation is not granted by our government. It is a human right that is recognize as the truth that is already is. Anything that prevents legal citizens the right to a fair and reasonable system to obtain the tools for self preservation is unjustified in every way, shape and form. This bill has all the purposeful markings of the intention to diminishing rights rather than expanding rights. There is zero evidence it will solve any wrong in and of society. It therefore is the worst kind of law. It is simply wrong for all you wish to serve properly.
