

To whom this concerns,

I am a law abiding citizen and I love my State. What I do not love is political agendas that want to take away from the very people who's tax dollars go to y'all's paychecks. Stop pushing down the rights of good people. I and anyone who resides here has a right to feel safe. Unfortunately those of lesser intelligence decided to pass this decriminalized BS on drugs. I have watched my state regress over the years. I would lie if I didn't say I wasn't concerned. It is all backwards if you ask me. We now have streets full of whacked out people with no consequences. I feel sorry for our men and women in blue.

People have a right to be safe. Personally I feel a sense of pride and safety when I see my fellow Oregonians carrying. The State has failed to protect its citizens, taking away our rights to "make more gun free zones." Gun free zones leave people as sitting targets for whatever criminal wants to hurt people, over and over again we see these situations come to an end because of armed citizens. Criminals couldn't care less about what the law says. The only thing this would do is take away more rights from those who follow the law.
