

Regarding 2A and the proposed background check change. The system is already overloaded and criminals do not use the legal channels of buying guns. Criminals buy things on the black market. This hurts law abiding citizens from exercising their 2A rights. Many people are into sport shooting, hobby, and self protection of self and property. There should not be an indefinite time that guns can be held just because the background checks do not complete in a timely manner. If that is the case then the agency doing the checks need to streamline and hire more people. We are the tax paying citizens and this is not what we signed up for. I won't vote for anyone in office that does not support 2A rights in a common sense way. The right to bear arms is apart of our constitution and I hope We All abide by it. The majority of gun owners are not criminals and should not be treated as such. We should keep a specific timeline for background checks to be completed.
