

I was a long time Democrat. It took me a long time to see the full history of racism in my Democrat Party. It is full blown now. All you want is a power grab. The Public School system started in 1854 as well because the Democrats didn't like certain groups, at that time the Irish and the Blacks so they brought in the Prussian/German school system to America to make obedient citizens out of us through that God awful public school system that is now crashing because of the teacher unions. Scott Adams says that is the biggest story out of 2021.

Stop your racist gun control bills.

"[1] David Babat: The Discriminatory History of Gun Control:

"Gun control in the United States is based on a long history of discrimination which continues to this day. While blacks were the first targets of gun control measures, different racial and ethnic minorities have been targeted over time, and today the poor now face economic discrimination in many gun control laws. Gun control may be portrayed as a measure to reduce crime,<sup>1</sup> but even in its earliest forms firearms regulation has been used as a means to control specific societal groups by keeping them from possessing weapons. The first selectively restrictive gun control legislation was enacted in the pre-Revolution South and primarily aimed at keeping free blacks from owning firearms and maintaining a white monopoly on power. Many different forms of gun control laws were implemented before and after the Revolution to keep firearms out of African-American hands. Even after the Civil War, Black Codes were enacted which ensured that supposedly freed blacks would not have effective means to defend themselves, and would remain an unarmed and subordinate group in society, unable to defend themselves or fight for their legal and constitutional rights."
