

As a woman of 58 yes old, I know I will be unable to fight off an assailant. Therefore my only safety is that of carrying a gun for protection. I feel this measure goes too far and limits my right to defend myself. We are an open carry state...we are a state that allows CC permits. We are not a state that allows those things except here, and except there. A non criminal carrying a gun is for the safety of all except criminals. There is no reason for this law except for the security of the criminal. I ask that common sense prevail on this one. Thank you.
