

Our small rural library struggles to keep up with the internet needs of our town. Please consider portioning funds to directly help cover the costs, and increase accessibility to rural library resources. We have a wonderful system that includes volunteer transportation of books from up to 50 miles away within the system. The new access to electronic materials has been a learning curve for our sole librarian, and she is managing well! Williams Library, part of the Josephine Community Library system, is a one room portable that often has ten cars double parked in our gravel lot. Any resources that can be sent this way will make a huge impact on the lives of those of us dependent on our library for knowledge, entertainment and communication, Imagine needing to drive miles to a library, weekly, to fill out your unemployment reports. I appreciate your extra time and efforts during an unusual period in history.
