

Thank you for your public service and hard work. Please give us parents the power to choose the school for their child. We pay taxes, we should be able to be proactive with the money we spend. On a practical note: all the scuttlebutt I hear from parents is that if they are denied the right to use an online out-of-district charter, they wouldn't use the district school anyway - so the district would gain nothing by refusing to release students. And that would be pointless and punitive.
