

Williams Oregon needs a permanent library built. Our library has been a hub for our community. Offering computer services to many without the means, chess club b for the local kids, story time for the little ones, and so much more! This has been done squeezed into a tiny little building for too long now! We are the only library in our county and our neighboring county that has been operating in a temporary building for over a decade! All other libraries have real buildings with extra rooms for community meetings and more. We don't even have a permanent bathroom facility! It is high time the state remedy this disparity and fund the building of a permanent library for Williams Oregon.
