

It is wrong for you to even consider these bills first:

you are wanting to make it illegal for concealed handgun license carriers to carry when going in public buildings or by public buildings which will leave us defenseless against someone wanting to do harm to me or my family.

Second:

Locking up our guns makes it impossible to defend ourselves against people wanting to harm us in our homes are we supposed to ask the intruders to give us a couple minutes so we can unlock our guns to defend ourselves you may not like your family or care what happens to them but i love my family and don't want harm coming to them.

All you are doing is making it easier for the criminals

Not everyone can afford big houses with gates or walls protecting them
