

I oppose the notion that the legislature can tell me how to live and how to think. The 2nd amendment is very clear and Oregon has been an open carry state from the beginning. this kind of rulemaking is what will push people into anger and frustration. A concealed carry permit is the citizenries way of being law abiding. this bill will have no affect on the people that carry weapons with out the permit. We already have rules and laws that are in place to enforce other rules and laws. What a Waste of resources and time.
