

Dear Chair Patterson and Members of the Committee,

I, Allyson Oar am pleased to offer my support for HB 2574.

To me, allowing for this kind of death care is not only environmental, but beautiful and equitable. I want my life to be commemorated by being part of something bigger than myself in this way. By giving back to the earth. I also hope this kind of death care will provide equal access to beautiful memorials to people from all backgrounds, reminding us that we are all in this life together.

I ask for your support of this important legislation.

Sincerely,

Allyson Oar

Portland, Oregon
