

Dear Chair Patterson and Members of the Committee,

I, Lise Hull, am pleased to offer my support for HB 2574.

I have been following the work of Recompose for some time and am very interested in having this option for when I die. The idea of returning my remains back to earth is extremely appealing to me for several reasons, including being environmentally friendly and a way that I can give myself back to the planet.

I ask for your support of this important legislation.

Sincerely,

Lise Hull
