

I am writing to express my support for SJR12. I have seen the negative effects of the repeated failures of our current health care systems both personally and on a professional basis as a social worker. I find it inexcusable that our nation, considered one of the wealthiest, does not have public health care. No one should ever have to choose between food or medicine, rent or a doctor visit, water bill or medication, labs or gas to get to work! I hope this amendment might lead to some improvement in the lives of so many struggling Oregonians.
