

Testimony in Support of House Bill HB 3016

May 5, 2021

Senate Committee on Health Care

Deborah Riddick JD, RN

Good afternoon Chair Patterson, Vice Chair Knopp, and members of the committee. My name is Deborah Riddick. I am the Director of Government Relations for the Oregon Nurses Association (ONA). We represent 15,000 registered nurses and professional members, and the Nurse Practitioners of Oregon. In response to our members' overwhelming requests, we stand in strong support of HB 3016, which would update our staffing law under executive order to ensure collaborative problem-solving during times of crisis.

In January of 2020, profoundly and ironically, the World Health Organization named 2020 the Year of the Registered Nurse and Nurse Midwife. At the time, we were proud of the global recognition that our profession was not simply the most trusted but was also deserving of the attention we never seek. Fast forward to March 2020, when our state began identifying wide-spread COVID 19 cases. Oregon nurses were on the job providing a disproportionate share of healthcare services and bore a disproportionate amount of the risk; nearly a year later, the same remains true. While the rest of us were distanced from exposure, nurses were exempt from that luxury. Constant exposure and the very real threat of death has become common place for our state's nurses. As nationwide surges occurred and hotspots like New York streamed stories of deaths so numerous that refrigerated trucks were required, our nurses remained on the job. The resulting traumatic stress and anxiety still plagues our nursing workforce and will remain with them for the rest of their lives. Nurses world-wide were heralded as heroes and public sentiments of appreciation were abound. And while both accolades and sentiment are warranted, passage of HB 3016 would be a more meaningful demonstration of support and solidarity with our dedicated front-line providers.

Throughout the pandemic, ONA created multiple access points to hear, first-hand, about our members experiences and frustrations. We heard from both rural and urban nurses from across the state, serving in small community facilities, mid-sized facilities, and large health systems. HB 3016 is brought to you in direct response to our members' feedback and reflect a common narrative. This bill addresses an unanticipated flaw in our current law and serves as an emergency preparedness update. Our nurses, those closest to this system deficiencies, have identified a solution demonstrating why their expertise is vital to any health system response. Your support would demonstrate that you hear them, believe them, and that you will do your part to protect them as they try to move forward, in a post-pandemic healthcare environment.

HB 3016 is a forward-thinking solution that address an oversight in current law related to executive order declaration. Currently, under such an order, nurse staffing plans are suspended until the order expires or

is rescinded. At the time, no one envisioned a pandemic that could keep an executive order in place for a year or more. We now know different and need to update the law to ensure collaboration on a flexible, facility-based, contingency plan is developed by nurses and administrators. Our nurse staffing committees are a national model that should be utilized, especially during times of crisis so ensure predictability and efficiency in process.

Oregon's nurses are the backbone of the healthcare industry. We serve in nearly every healthcare setting and do so with pride and compassion. Our state was able to manage and suppress anticipated surges, against all odds, due in no small part to our nurses. During yet another Covid surge, our nurses continue up for communities all over the state. They need you to show up for them by unanimously supporting HB 3016. Send a clear message that their ongoing sacrifice warrants the protections and certainty they are seeking. This bill was passed by you colleagues in the House. We now urge your support. Stand with Oregon nurses and vote yes to HB 3016.
