

I STRONGLY OPPOSE

WHAT A CROCK OF POEY!

The definition of "Female" means an individual who self-identifies as a woman, regardless of the sex assigned to the individual at birth. It seems a man can self identify as other than male and qualify. Women work hard to earn their place and this is offensive and belittling to a woman that would be appointed to a board for any other reason than her ability. Underrepresented means an individual who identifies as having a low income or low income background, which includes about anyone except a straight white person, and they should feel the same about their ability to qualify.

When are you going to quite playing nurse mate to a nanny state and teach dignity and respect for all?
