

I urge your support for SCR 17. This resolution recognizes that the lack of services and essential infrastructure and disproportionate exposure to environmental hazards faced by many communities in Oregon is a product of exclusion from and unequal access to decision-making processes. SCR 17 would help align the equity goals throughout the legislative and administrative branches of government to build a just, equitable, and resilient future for all Oregonians. Please help Oregon lead the nation in advancing environmental justice by supporting this legislation. Thank you.
