

How can you regulate something that's not yours? Energy is free, energy is always moving. Energy is channeled through a master and is free. There is no touch even needed for this energy transfer to occur. We are not manipulating tissue or muscle. All work is done through space and time. This is Eastern medicine in its best formation. Please don't take away from this beautiful practice by putting laws, rules and a price tag. Stop making this about money and make it about people's health and mental well-being.
