

I am a professional certified Reiki and Karuna Master. This bill only serves to create money for government and corporations. We already know that the medical field that is supposed to be heavily regulated has gone down hill since it became for profit and many "professionals " have been profiting off of the people who are ill and these patients have been giving pharmaceuticals which have very seriously impacted the health of these patients, Meanwhile the pharmaceutical companies are raking in big profits for drugs that are killing people. Reiki and other energy medicine does not harm people, it helps heal people who have not been helped by licensed professionals and the marketing of the dangerous drugs that the medical professionals are peddling. What are the drug regulating agencies doing to monitor these drugs that are making people sick, that are giving people cancer. Who is regulating the insurance companies that people pay into and then when these people need services the insurance companies do not want to pay for the services their customers need. This is a bullshit bill that does not help the people. I am strongly opposed to this bill.
