

Eden Energy Practitioners should not be included in Bill HB 2493. The Eden Method of Energy Medicine already provides a two-year basic certification program with two additional years of optional advanced training.

Students must successfully pass a rigorous practical exam, written exam, and ethics exam to obtain certification. As in medicine, nursing, massage, acupuncture, etc, continuing education is required every two years as is professional liability insurance. It is important for you to realize that several energy healing modalities share this rigorous type of training, such as Healing Touch, the Brennan School, etc.

The Eden Method of Energy Medicine is dedicated to ensuring EEM Practitioners are ethical and professional practitioners. Again, Eden Energy Method Practitioners should not be included in HB 2493.
