

Your submission form has forced me to remove some punctuation, I apologize for the difficulty this may cause in reading this testimony.

Due to the current lack of accountability for law enforcement in the state of Oregon, I have reached a point where I have to assume that every single law enforcement officer I encounter is a violent terrorist who intends to kill me.

The clackamas county sheriffs office recently allowed a deputy to retire, with full benefits, after he was caught ON VIDEO instructing members of a militia kidnap squad who were at the time actively committing multiple crimes on how to alter a crime scene after a murder to make it seem justified .

Specifically he instructed them to plant weapons on anyone they murdered to make it appear as self defense.

The portland police attack people with potentially lethal weapons, at random, for committing the crime of being downtown when they decide they want to declare a riot.

My ankle is permanently injured because a PPB officer blindly threw a grenade out his window while driving 20 plus miles an hour, directly striking me, as I and others fled the PPBs indiscriminate hail of potentially lethal FN303 rounds.

When I contacted IPR they made it clear that if I wanted to submit a complaint, my information would be shared with the Portland Police for the purpose of harassing and threatening me, and I decided against seeking medical aid due to the known risk of PPB officers harassing and arresting their victims at emergency departments.

I have permanent hearing damage and persistent tinnitus from the portland police LRAD acoustic weapon and again I was unable to submit a complaint or seek medical aid of any kind for fear of reprisal from the PPB.

While a database of use of force incidents will quite obviously not solve all of our law enforcement problems (you cant stop an abuser simply by identifying them as one) it is a significant step towards holding criminals and terrorists responsible for their actions and must be implemented as soon as possible.

I fully expect that I will be further targeted by law enforcement for submitting this testimony but if citizens don't speak up, the only voices you hear are the police and their lawyers, who have such a clear conflict of interest its actually funny that you're allowing them to testify at all.
