

## **Robyn Roth**

Testimony regarding harmful HB 2493

My name is Robyn Roth and I am a Reiki practitioner in Los Angeles, CA. I have witnessed so many people's lives improved and positively transformed due to Reiki healing I've done myself, and as a result of people I know who practice hypnotherapy and other emotional processes as healing treatment for trauma and other ailments both physical and mental people deal with, some for most of their lives. These alternative treatments have been scientifically proven to improve the mind and body health of ailing people and, like Chiropractic care and Acupuncture, should be accepted as effective and necessary healing practices. Please oppose this harmful proposal and let these incredibly effective and important practices continue.

Thank you

-Robyn Roth
