

I support increased oversight and misconduct standards because the Portland Police responded to largely peaceful protest with aggressive violence over 6000 times according to some reports and not one single officer has been held accountable for this behavior. I further support amendment 4A to strengthen standards and improve public disclosure of misconduct. Finally, while I do not know what "Technical infraction" means specifically,(Amendment 4A page 1, line 9) It seems like that wording creates a loophole to avoid oversight and should definitely be examined more closely.
