

Dear Chair Nathanson and Members of the Committee:

I am writing to support HB2021, the 100% clean energy bill. This bill is the foundation for reducing climate change emissions. With a clean grid, we can transition to clean electricity, clean cars, clean hearing and more. In my city of Lake Oswego, thousands of citizens are engaged in ways to create a cleaner future. Many school children are advocating this change so that they will have a safe place to live. Here are some benefits of the bill:

*This bill supports our statewide economy. Oregon has a large clean energy sector, but we're falling behind other states in policy and investment. This bill will put us back into a leadership position

*This bill contains protections for workers and will create good jobs throughout the state

* With 100% clean energy, we will reduce toxic air pollution that threatens the health of Oregonians, particularly those who are low income and of color

* With this bill we protect the future of our forests, our soils, our agriculture and coastlines by doing our part to reduce the danger of climate change

*With this bill we stimulate innovation and investment

This bill is a winner for all Oregonians. Please pass this bill.

All the best,

Lisa Adatto
