

Senate Education

Absolutely against this bill to again distract from our students education in three R's to other arenas.

Is this conditioning for abortion and selling body parts????

There is absolutely no reason children should be taught about this on school.

When we are old enough to drive we have an option to decide if we want to participate. That decision will be made by family and the driver. That's where it should stay

This is a awful bill. How dare you start trying to get kids thinking about selling body parts through a donation program. It's a entry level thought changing program. Low blow even for Dems.

Thank you

Liz Turner
