

Hello,

As a Willamette Riverfront homeowner I strongly oppose this bill and continued restrictions of boating and towed watersports. I have lived on this river my whole life and am saddened that a vocal minority continues to attack the way of life that so many of us riverfront homeowners have come to enjoy.

There is no compelling scientific data to support the argument that wake boats cause erosion- we all know the main threat and cause of erosion is seasonal rise and fall of the river.

Please don't further confuse or restrict access to our precious waterway. Enforce the current rules and stop pushing this unnecessary legislation.

Respectfully,

Rachael and Nick Fisher
