

it's time to move on the issue of fair taxation. I am a small forestland owner and property taxpayer who is tired of timber companies avoiding their fair share of taxes. because of this, every few years our family ends up voting on school bond levy's and sheriff department funding and this year on fire district funding just to maintain these essential services. I would have preferred more revenue for counties.

of the two amendments being considered, I support the second proposed by rep. Nathanson. jan nelson, 85354 Doane Rd, rural Lane, 97402
