

Rep. Nearman should be expelled from office. There is clear evidence that he aided the armed rioters in planning their attack on the capital building. On the day of the attack, according to the plan he helped lay out, he easily and happily let these fringe groups of racist, misogynistic, xenophobias into the capital, endangering the lives of all the people inside. His reckless disregard for the lives of others that day should exempt him from public office, now and in the future. I thank the republicans in the house for calling for his resignation, and hope they support expelling him if he does not do the right and decent thing himself. Please don't let this act of sedition go unchecked, he must be expelled.
