

I opposed the closure of the Capitol and supported the delay of legislative session until we could all have been present. Tina Kotek was completely wrong in her handling of this and we know why; she didn't want the public's presence. I have logged in to give testimony and it is NO substitute with its problems and lack of feedback. I saw a video of two legislators in a coalition meeting in January laughing about how keeping the Capitol closed was going to make it easier on them and how they wouldn't have to deal with the public.

Mike's actions may be construed as a mistake but the performance outrage by some Dems is absolutely reckless. Calling constituents white supremacists who tried to overthrow the government is irresponsible and a complete falsehood. Vote no to expel Mike Nearman.
