

I oppose more regulations on the Willamette river. It's becoming impossible to take my family on the river. We saved our money for years to afford a boat that we are now not able to use. We love to fish, tube, ski and wakeboard on the river. Now all of the boaters are being shoved into the same areas, which is very dangerous. I fear my kids or myself will get hit by other boats that are forced into these areas. There must be a way we can share the river and not just give access to one group.
