

I believe that imposition of indefinite delays or blocking by defacto denials in the utilization of rights guaranteed to Citizens of Oregon by the Bill of Rights, by making them dependent upon the funding, staffing, scheduling, systems, and data operated by various departments at the state level are unacceptable burdens upon exercise of that right - in this case the Second Amendment to the US Constitution. An "instant background check", including the citizen providing evidence of such rigorous legal checks being in place for existing licensing such as a CHL/CCW permit, FFL approval status, or State Drivers License, can provide evidence of presence/lack of criminal history.
