

Humans as a race have diminished the natural beauty of the earth to the point where this beauty is not going to be existent for our children to observe. By having hunting contests, we are further supporting the intent to reduce the chance for the natural world to heal. Hunting predators in an ecosystem has been especially shown to have the largest impact on whether the ecosystem will be able to heal without human intervention.

Society has progressed exponentially in the past 100 years, and continues to do so thanks to humanity's technological advancements. In our modern age, why are we still supporting the barbaric structures of contest hunting over the need for our respect and help to the health of our world's ecosystems.

Please support this bill for the end of hunting contests of coyotes. This would be a good step in the right direction for how we should move forward as a race into the future. Not only for the health of our planet, but for preserving the natural wonder for future generations to behold.
