

I am an employee of Hillsboro School District and have been for 24 years. My husband retired last year and we now rely on his social security and my wages to live on. With our combined wages we as a couple have poverty level income. We also have a disabled adult son that lives with us. It is expensive to pay for health insurance but I can't go without it as I have medical issues that need constant monitoring. Having part of the burden off my shoulders would be a huge help.
