

**Testimony from Max Jones for the February 15, 2021 Meeting  
of the Senate Committee On Health Care**

I support Senate Bill 428 extending the timeline for the Task Force on Universal Health Care. Our on-going pandemic has disrupted organizational schedules across the state, including the Task Force, while demonstrating in the strongest possible terms how our current health care system is totally inadequate and in urgent need of reform.

Health care reform is an important issue and a very complex issue. It is essential that the Task Force have the resources, including time, to do the job right.

Thank you for your consideration.
