

Legislators,

This bill will create a situation whereby I as a concealed carry permit holder am going to break laws no matter how carefully I try to remain legal. When I travel throughout our wonderful state I will almost certainly enter zones that have been ruled gun free unknowingly. I am a law abiding father, husband and citizen of this state. I carry a firearm because I am well trained and committed to protecting my loved ones.

If this law were passed I would fear for my children and their school mates. If a homicidal psychopath were to assault my children's school who is going to protect them? The time between an armed police response and the ending of a threat is time our children will pay for with their lives. As a concealed weapon permit holder I am one of the good guys who would die to protect our children from harm. Please do not take from me the ability to protect my children and loved one or worse, potentially make me a felon for not following a law that could potentially be impossible to comply with.

Thank you,

Steve Eadie
