

There is no evidence this bill is necessary. It only takes aim at law abiding citizenry. Those who do their due diligence to be properly licensed will no longer have rights previously granted. This will turn Oregon into a patchwork of red zones where no matter what you do you can not exercise a basically human right to self preservation. It completely violates article 2 section A of the constitution of these United States where as stated THE PEOPLE have the right to keep and bare arm. This law aims to erase the right to bare arms through confusion as a zone specify sub law undermining basic constitutional law. This will create criminals out of law abiding citizens and by doing so strip the first and second parts of the constitution article 2 from them. This is the worst kind of law it solves nothing and creates criminals. The right to keep and bare arms is not a privilege... it is a right!
