

This bill must be stopped. You need to remind the people of the legislature that they swore, hopefully on a Bible to uphold not only the State but also the U.S. Constitutions! Ask them what part of those documents do they not understand when they say "SHALL NOT BE INFRINGED."

Are they going to hire armed security guards or police to protect the public when they are in public gun free locals since we would not be able to protect ourselves and others from armed criminals who will and do frequent these types of places to raise mayhem. Remind them and yourselves that as you are supposed to be doing the public's, your bosses, work that you folks are behind locked doors and fences, that are being guarded by Armed OSP officers.

Thank You for hopefully reading this far.
