

The only logical reason to introduce same-day voter registration would be to introduce additional voter fraud. This would place burden on our county elections to vet and verify same day voters. This would put an undue strain on our voting system and further degrade the integrity of an already fragile system.

I strongly oppose same-day voter registration as it serves no valuable purpose to our society. The right to vote is guaranteed but the right to vote without proper verification that you are in fact an eligible voter is not guaranteed. System of voter registration has survived and should remain intact as is to preserve the integrity of our vote, The functional operation of our elections already in Jeopardy and I question the motives of anyone who would wish to further jeopardize its trustworthiness in public eye.
