**Re: I GRUDGINGLY SUPPORT [HB 2263]...**

**Competent and analytical tracking of marijuana should already be in place.**

[HB 2263] indicates someone hasn't been doing their job as the Marijuana industry may have gone down a criminal path.

The growing, processing and sale of Marijuana should be strictly controlled.

Warrantless inspections without prior notice is required.

Perhaps a "bar-code system" or other form of technology could be employed to capture the marijuana during the growing, processing and sale of this product.

For violations there must be; swift, certain and severe penalties including "hefty fines."

***There is tax revenue that is not being collected. This is unacceptable.***

***Respectfully submitted,***

/s/ David S. Wall
