

I think the politicians in this country have forgotten that "We" live in the greatest country in the world. It is great because of the freedoms we are granted by the Constitution. Our citizens have experienced liberty and the pursuit of happiness in a way that is unprecedented in history. The ability to protect our lives, families, property, and livelihood is one of those fundamental rights. When you defund the police and limit their ability to protect and serve their community who will protect us when we are away from our homes. When you have politicians who let rioting mobs burn and loot for days and months. Who will protect your property or business or family? Why are we punishing law abiding citizens who go through the legal process to obtain a CHL. This is not smart legislation. When criminals know there won't be opposition to their activity they are emboldened. These areas are statistically where mass shootings happen. "Soft targets" that are gun free zones. They don't attack police stations. They attack defenseless citizens who are restricted from protecting their own lives. This is bill is unconstitutional and I'll advised!
