

Senate Committee on Judiciary and Ballot Measures

Chair Prozanski

Vice Chair Thatcher

In a time when our state and entire nation is in horrible turmoil and divisiveness, I believe, first, this bill is poorly timed. Politically speaking, it may merit consideration for those who oppose the second amendment of our nations Constitution. It should be killed now to, perhaps, circle back for another look when our voters have a calmer disposition. I believe half of our country is getting fed up with our elected officials “beating this dead horse” and it could be more inflammatory than progressive. I don’t see how the passing of this bill could or would lessen the tension of your voters.

I believe that millions of legal gun owners, with or without CCL licenses, would never use firearms to commit a crime or fire upon another human being with the intent to commit murder. I also believe that the criminals (who disdain law consider any effort on your part to legislate any form of gun control outside of the second amendment a boon to their agenda) could not care any less. I do oppose SB554 and ask that you would kill the bill.

Respectfully,

Michael S Huard
