

I am absolutely sick of gun violence. There is no rational reason why anybody should be allowed to carry a loaded weapon into a public building. (For that matter, there's no rational reason why anybody should be allowed to intimidate other people in any public spaces - such as coffee shops or any other small business.) Guns have one purpose - to kill. Nobody should be subjected to the intimidation and potential threat posed by armed individuals in public spaces. I wholeheartedly support SB 554. Please vote to make it the law.
