

Having businesses closed for almost a year now is killing Oregon's economy and Oregon families. Please open the state to business, especially restaurants and gyms. Gyms are clean and everyone cleans their space after each use. There is simply no common sense reason why restaurants and gyms are closed, especially for almost a year! Oregon did not close for H1N1, SARs, seasonal flu, etc. why is Oregon still closed for Covid-19? Oregon needs to start defending their businesses and economy or the state will fold and no one in government will have a paycheck because there won't be a government to pay.
