

I would like this bill to go even further. We need to remove all of the Governors restrictions removed. There are new medications and treatments available,, so there is no longer the death rate there was. We are adults and know what we should do to provide our own protection and when this does not work we can get medical care as a result of these new treatments. I also think there are political considerations in these ruling, the Portland metro area is opened up while Jackson county is not! Schools should have been opened 6 months ago and are still not.
