

I am so supportive of this bill! The Cahoots program and others like it go above merely punishing crime but address the root cause of where crime stems from. I believe this bill is integral in helping our citizens and community to become healthier and better able to function. The jobs it provides will increase the amount of skilled, compassionate citizens who are willing to problem solve instead of just patching the situation. Studies show that these programs serve the community better than police on their own. To better our communities we must begin addressing where issues root from and take action towards that cause.
